Scott & Garrett –

Please see below & attached.

I dug out the Act 537 Plan from our basement archives and it is now sitting on my desk. The documents are a huge stack. I am going to take to a professional copy provided to make paper and digital copies that I can then send to you.

Rob

Subject: Towamencin Township Sewer System Limited Scope Valuation Data Request Information

Hi Rob –

Attached is information requested by PFM for their Limited Scope Valuation of our sewer system. In addition to the attached, please note:

1. The number of residential EDUs being billed as residential is 7,572. This does not include the 494 EDUs billed for residential properties that are billed as flat commercial customers.
2. Once I receive the spreadsheet from TMA listing commercial EDUs, I will forward. We do not categorize anyone as industrial in our processes.
3. We do not own or operate any grinder pumps and we have one customer with a deduct meter, Arctic Glacier. Deduct meters are allowed per our code but are the complete responsibility of the customer.
4. The total annual flow in gallons for commercial customers for 2019 including Hatfield Quality Meats was 1,933,185,839.38. Again, we do not categorize any customers as industrial and residential has no annual flow as they are billed a flat rate.

Please forward this information to the appropriate person/persons at PFM.

Thanks Rob

Brooke
