

# TOWAMENCIN TOWNSHIP RAIN GARDEN WORKSHOP

Thursday, April 27 @ 6:30 pm

## What is a Rain Garden?

A rain garden is a bowl shaped garden designed to collect several inches of water during a storm, providing time for infiltration into the ground & absorption by native plants - two natural ways of filtering out pollutants!

## Rain Garden Benefits

- Reduces stormwater runoff & flooding
- Filters pollutants
- Recharges groundwater resources
- Low-maintenance landscaping
- Attracts birds, butterflies, & other wildlife
- Increases beneficial insects
- Decreases mosquitoes
- Aesthetically pleasing

## About the Workshop:

**Date & Time:** Thursday, April 27th, 6:30 pm - 7:30 pm

**Location:** 1090 Troxel Rd, Lansdale, PA 19446

**Cost:** \$10 / person. Registration includes 3 native perennials for each participant

**Topic:** Learn about stormwater management techniques for your property, with an in-depth discussion on rain garden construction and maintenance.
